This textbook has been designed to meet the needs of B.Sc. Second Semester students of Chemistry as per the UGC Choice Based Credit System (CBCS). With its traditional approach to the subject, this textbook lucidly explains principles of chemistry. Important topics such as chemical energetics, chemical/ionic equilibrium, aromatic hydrocarbons, alkyl/aryl halides, alcohols, phenols, ethers, aldehydes and ketones are aptly discussed to give an overview of physical and organic chemistry. Laboratory work has also been included to help students achieve solid conceptual understanding and learn experimental procedures. In his new collection of quirky, bittersweet stories, Carlson observes the men and women of the middle class, people who find themselves settling uneasily into lives they never envisioned for themselves. Carlson uncannily captures the complexity of his characters' inner lives. This book is of interest to mathematicians and computer scientists working in finite mathematics and combinatorics. It presents a breakthrough method for analyzing complex summations. Beautifully written, the book contains practical applications as well as conceptual developments that will have applications in other areas of mathematics. From the table of contents: \* Proof Machines \* Tightening the Target \* The Hypergeometric Database \* The Five Basic Algorithms: Sister Celine's Method, Gosper's Algorithm, Zeilberger's Algorithm, The WZ Phenomenon, Algorithm Hyper \* Epilogue: An Operator Algebra Viewpoint \* The WWW Sites and the Software (Maple and Mathematica) Each chapter contains an introduction to the subject and ends with a set of exercises. Current methods for estimating the wavefront slope at the aperture of a telescope using a Hartmann wavefront sensor are based upon a centroid shift estimator. The centroid shift estimator determines the displacement, or shift, of the centroid off the optical axis using a moment calculation of the intensity distributions recorded in each subaperture. This centroid shift is proportional to the average slope of the wavefront in each subaperture. A maximum a-posteriori (MAP) slope estimator takes advantage of a-priori knowledge of the wavefront slope statistics and total irradiance falling on the subaperture detector arrays when determining the shift estimate. In order to derive a closed form solution for the MAP estimator, several assumptions were made: infinite resolution on the detector arrays, no read noise in the detection process, and no intensity spillover into adjacent subapertures. By implementing the Hartmann wavefront sensor and MAP estimator in simulation, the performance of the MAP estimator was evaluated using realizable wavefront sensor parameters. While the MAP estimator mean square error (MSE) performance decreased relative to the centroid estimator MSE performance as a result of spillover, finite detector resolution, and read noise, the MAP estimator MSE performance was found to be upper bounded by the centroid estimator MSE in all cases.

An alphabet book for babies, featuring illustrations, words, and sentences for each letter, and including textures to touch. This collection of programs, anecdotes, and reflections seeks to accomplish what may sometimes seem like an impossible task: motivating students. Dr. Richard O ' Connell, EdD, who has helped countless students over a career spanning more than forty years in New York and New Jersey schools, shares an array of tools and insights to help you promote student achievement. The programs are actual plans of action to influence students, which have been incorporated into schools. The anecdotes are stories, instances, and advice that you can adapt to your own special circumstances. They are printed in bold so you can find them easily. The reflections are the author ' s thoughts and ruminations on important concerns that pertain to students. As you read, you ' ll discover the importance of looking beyond appearances, finding out what motivates students, how to engage with them, and how to get them excited about learning. Whether you are a parent, counselor, teacher, principal, volunteer, or intern, the advice in this guide will help you make meaningful progress in promoting student achievement. All royalties will be donated to charities. We often go to church on Sunday, then lose touch with God's word amid the craziness of our weekly routine. This series helps the entire family stay in touch with the word proclaimed in liturgy. For every Sunday and holy day of the year, each book offers three sets of prayerful reflections that parallel the lectionary: one for adults, one for teens, and one for small children. A thematic index is included for easy reference. These books are ideal for liturgy planning, and they're perfect for helping the entire family stay focused on prayer--all week long. B is for Burglar, from Sue Grafton's #1 New York Times bestselling Kinsey Millhone Alphabet mystery series Beverly Danziger looked like an expensive, carefully wrapped package from a good but conservative shop. Only her compulsive chatter hinted at the nervousness beneath her cool surface. It was a nervousness out of all proportion to the problem she placed before Kinsey Millhone. There was an absent sister. A will to be settled--a matter of only a few thousand dollars. Mrs. Danziger did not look as if she needed a few thousand dollars. And she didn't seem like someone longing for a family reunion. Still, business was slow, and even a private investigator has bills to pay. Millhone took the job. It looked routine. Elaine Boldt's wrappings were a good deal flashier than her sister's, but they signaled the same thing: The lady had money. A rich widow in her early forties, she owned a condo in Boca Raton and another in Santa Teresa. According to the manager of the California building, she was last seen draped in her \$12,000 lynx coat heading for Boca Raton. According to the manager of the Florida building, she never got there. But someone else had and she was camping out illegally in Mrs. Boldt's apartment. The job was beginning to seem a bit less routine. It turned tricky when Beverly Danziger ordered Millhone to drop the case and it took on an ominous quality when Aubrey Danziger surfaced, making all kinds of wild accusations about his wife. But it only became sinister when Millhone learned that just days before Elaine Boldt went missing, her next-door neighbor and bridge partner had been murdered and the killer was still at large. A house destroyed by arson. A brutally murdered a woman. A missing lynx coat. An apartment burgled of valueless papers, another ransacked in a melé e of mindless destruction. And more murder. As Millhone digs deeper into the case, she finds herself in a nightmarish hall of mirrors in which reality is distorted by illusion and nothing--except danger--is quite what it seems. PLEASE SCROLL UP AND BUY For the last twenty years, George Saunders has been teaching a class on the Russian short story to his MFA students at Syracuse University. In A Swim in a Pond in the Rain, he shares a version of that class with us, offering some of what he and his students have discovered together over the years. Paired with iconic short stories by Chekhov, Turgenev, Tolstoy, and Gogol, the seven essays in this book are intended for anyone interested in how fiction works and why it's more relevant than ever in these turbulent times. In his introduction, Saunders writes, "We're going to enter seven fastidiously constructed scale models of the world, made for a specific purpose that our time maybe doesn't fully endorse but that these writers accepted implicitly as the aim of art--namely, to ask the big questions, questions like, How are we supposed to be living down here? What were we put here to accomplish? What should we value? What is truth, anyway, and how might we recognize it?" He approaches the stories technically yet accessibly, and through them explains how narrative functions; why we stay immersed in a story and why we resist it; and the bedrock virtues a writer must foster. The process of writing, Saunders reminds us, is a technical craft, but also a way of training oneself to see the world with new openness and curiosity. A Swim in a Pond in the Rain is a deep exploration not just of how great writing works but of how the mind itself works while reading, and of how the reading and writing of stories make genuine connection possible.
